ISA Transactions 32 (1993) 409–411
Elsevier

Contents Volume 32

Volume 32, Number 1, March 1993

1 **Editorial viewpoint**
5 **Customer-focused communication: The key to total quality success**
Fred Alsup
9 **Marketing must be a quality process discipline too!**
Jerry Vieira
15 **Customers improve the quality of training**
Peter Daniels
19 **The art of effective trainer questioning**
Ray E. Sanders
23 **Partnering: The key to dynamic product documentation**
James M. Brannan, Kathryn D. Brothers, Mary K. Richardson and Charles V. Simms
31 **Quality in the '90s is more than just statistical process control**
E.D. Withee
39 **The role of the distributed control system in meeting the objective of continuous quality improvement**
Mike Willey
45 **A strategic focus for process control**
John P. Hanley
51 **Continuous improvement through designed experiments and multi-attribute desirability optimization**
Carol Ventresca
65 **Computer systems validation and the software development process**
David L. Deitz and Christie J. Herald
75 **Managing control systems engineers in an engineering contractor environment**
Paul Boyette and Romel Bhullar
81 **The concept of accredited certification (registration) of quality systems to ISO 9000 in the European Community**
Peter Rodholm and Yehuda Dror
87 **About the Editor and Authors**
89 **Guide for Authors**

Volume 32, Number 2, July 1993

93 **Editor's Viewpoint**
95 **User interface in the 1990's**
Charles Ottino
123 **Development of an international standard for documentation of software for process measurement and control systems and facilities**
J. Jekielek

133 MRP II concepts for process control engineers
Douglas J. McKay
139 Use of neural networks in nuclear power plants
Robert E. Uhrig
147 Strategies for implementing advanced process controls in a distributed control system (DCS)
Romel S. Bhullar
157 Distillation column control design using steady state models: Usefulness and limitations
Paul S. Fruehauf and Donald P. Mahoney
177 DCS-based alarms: Integrating traditional functions into modern technology
John A. Shaw
183 Emerging chemical sensor technologies for use in on-line applications
D.J. Ehntholt, R.F. Tayor and E.V. Miseo
189 On-line instrumentation of cryogenic systems and plant to an accuracy of 0.01% using cold electronics
R.G. Scurlock
193 Process control communications: Token bus, CSMA/CD, or token ring?
John D. Wheelis
199 International ("World Class") certification for hazardous location electrical equipment
Andy M. Owler

Volume 32, Number 3, October 1993

207 Editor's Viewpoint
209 Control system quality is free
William M. Goble and Ted W. Tucker
215 Use of electronic identification (eID) and signatures for integrated operations
Barbara Meserve and Joe deSpautz
225 A new paradigm for industrial control system design
Richard P. Neidert and William Wilson
235 It takes knowledge to apply neural networks for control
Malcolm C. Beaverstock
241 Nonlinear model-based in-line control of wastewater pH: A laboratory study
Suhas K. Mahuli, R. Russell Rhinehart and James B. Riggs
247 Application limits of electromagnetic flowmeters: What do we really know about them?
F.A.L. van Laak
277 A tutorial on the measurement of paper stock consistency
Michael H. Waller
283 The organisation of instrument evaluation by an accredited laboratory
R. Cooper

291 Electrical noise considerations in facility / plant design
J.E. Kincaid and M.A. McGregor
297 Utility Communications Architecture review
Surja Sutanto and R. Page Heller
301 Strategic field device integration – Your platform for future success
Romel S. Bhullar and Stephen Sandler

Volume 32, Number 4, December 1993

311 Editorial
313 Editor's Viewpoint
315 Getting the best return on your process control investments
Thomas E. Aryal and Sanford J. Melville
323 Dynamic simulation as a tool to integrate process design and process control
Vincent G. Grassi
333 Practical applications of artificial neural networks in chemical process development
David E. McAnany
339 Robust predictive controller in object-oriented implementation
Wilhelm K. Wojsznis and Peter W. Wojsznis
345 Utilizing multi-language international software standards for distributed process control
F.P. Bader
355 Reduction of variation in the gasoline blending process—A case study
Helmut Schneider, James M. Pruett and Lawrence Magee
367 Effect of process dynamics on traditional controller tuning methods
John A. Shaw
375 Process computer audits
Tom Lagana
381 Intrinsic safety revisited in the chemical process industries of the 90's
E.A. Comello
387 Control system safety interlocks—Design and implementation
Victor J. Maggioli and William H. Johnson, Jr.
393 Vortex anemometer for measurement of both speed and direction of the wind
Sophie Goujon-Durand
397 Turbidity measurement
Ravi Jethra
407 Author Index Volume 32
409 Contents Volume 32
